Subject: RE: arcelor status

We requested information from Tom about their well monitoring program (well locations, procedures to monitor these wells and what specific contaminants these wells are monitored for). We are also waiting on our sample results, but they'll probably be consistent your samples.

When the PR's stopped by today there was a 2' by 20' silver sheen inside of the containment boom at 009/010 and 001 had the same sheen as always.

Very Respectfully,

MST1 Sean Fitzgerald

Subject: [Non-DoD Source] arcelor status

Is there any information we are still waiting from for arcelor to make any decisions on this site? (such as how to move forward from where we are)
